BUSINESS DIVISIONS

CONTRACT MANUFACTURING

- Services** Expert process development by degreed engineers, including validation, prototyping, and scalable domestic production for both low- and high-volume needs from standard to micro-wire applications. Committed to precision, reliability, and seamless support throughout the product lifecycle.
- Features** Driving continual improvement across processes, equipment, controls, and training. Our disciplined manufacturing ensures repeatability, detailed process documentation, and optimized quality. A modular production floor with well-maintained, fully supported equipment enhances efficiency and scalability. Compliant with ISO 9001 (Quality Assurance Management System) and ISO 13485 (Medical Devices Quality Management) standards.
- Capabilities** Scalable production solutions from manual to semi-automatic and fully automated processes. Technical expertise includes cutting, stripping, crimping, tinning, plugging, and soldering. Manual processing down to 40 AWG.

Locally connected, globally trusted.

DISTRIBUTION

- Services** Partnering with 70+ trusted suppliers across 21 categories, including electro-mechanical, interconnect, passives, and support products. With over 27,000+ listed part numbers and robust on-hand inventory, we ensure reliable supply chain solutions.
- Features** Minnesota-based and a trusted global distributor, featuring full-package quantity discounts, blanket orders, and custom stocking programs. Flexible net terms are available to support customer needs.

eCOMMERCE

- Services** Secure online store providing real-time access to pricing, available inventory, manufacturer lead times, detailed part descriptions, images, and datasheets.

CUSTOMER SOLUTIONS

- Services** Our US-based Customer Solutions team brings extensive manufacturing expertise, delivering exceptional support through strategic partnerships. We assist with Estimated Annual Usage (EAU) reviews, ensure parts availability, address pricing inquiries, and manage Bill of Materials with precision and efficiency.
